

## Environmental Policy

### Statement of Intent

Regents Contracting Ltd will pursue a policy aimed at minimising environmental damage and maximising opportunities for environmental improvement.

In all of our activities we shall consider environmental impact at the planning stage. We shall maintain good standards of pollution control, conservation of energy and natural resources.

To implement this policy the company will ensure its site management and supervisors are aware of the environmental implications of activities within their own areas of responsibility, where necessary additional training may be required to heighten awareness of the relevant issues.

On individual contracts, we shall endeavor to obtain the best advice from our clients concerning environmental aspects of the contract. In many cases our client (the Principal Contractor) will already be implementing ISO14001 systems; we would actively support and implement those systems as instructed.

During the execution of our works we will manage and organise the works in a manner which will reduce, so far as is reasonably practicable, environmental damage caused by:

- Noise
- Dust
- Effluent / Cleaning waste arising from the works
- Storage and use of cleaning materials etc.

In simple terms we aim to Reduce waste, Re-use materials where possible and Recycle. In many cases we will offer alternatives to Client specifications if we feel the 3R's is not being fully utilized.

We will also take effective precautions to protect adjacent land, buildings and the general public from any danger, discomfort or nuisance.

In pursuance of this policy, environmental considerations will be taken into account in the selection of materials, which be from wherever reasonably practicable sustainable sources.

All waste material will be disposed of appropriately.

All members of the company's management and supervisors will be made aware of this policy and its contents.
